

# Specification

Name : LED Street Lamp

## Description :

LED : 806pcs

Light Color : Warm white

Lens: Toughened glass

Operating Circumstance :

Operating Voltage : 12V DC

Operating temperature : - 40C~+60 C

Deposited temperature : - 40C~+60C

## Electric specialty:

Light Efficiency : 90%

Total current of whole lamp : 5A

Power : 60W

Power Factor: 0.95

Surface brightness : 36000Lux

Luminous flux : 5500Lm

Color temperature : 3000~4000 K

Brightness of each LED : 3000-4000mcd

Beam angle of each LED : 130°

Lifetime of lamp-house : 50000h

IP : 65

Executive standard : IEC598

Electronic safety standard : CLASS 1

## Installation instruction:

1. Open the junction box, fasten the wire following the indication of label and then closed the box.

Make sure the fasteners are firm enough and the box is waterproof.

2. Fasten the lamp with tighten screw to pole and make sure of its firmness.

3. Don't turn on the switch until everything is ready. (This light is 12 V DC; Make sure connect electro linking well as positive-negative character.)

Attention: The lamp of IP65 is outdoor light. Check the waterproof junction such as glass and lead wire after installation. Fasten the lamp junction to the pole with screw. (Connector is round tube)

## After Service:

The product refers to electrics knowledge. Please don't disassemble it by yourself. If any quality problem happens, please contact with the after-service department.
